PHILLIPS-MEDISIZE LOCATIONS:

Czech Republic, Denmark, Finland, Ireland, Poland, Asia, Mexico, USA

WHO ARE WE?

Phillips-Medisize is a plastics injection molding contract manufacturer and a global leader in outsource strategy, design, development and technology-driven manufacturing for the pharmaceutical, medical and commercial markets. The products that we manufacture provide medical solutions to our customers and ultimately their patients across the globe. We are the Medical & Pharma Solutions (MPS) Division of Molex and our parent company is Koch.

THE WORK WE DO MATTERS

In the last year, we helped our customers with...

-  10 million patients with diabetes
-  Conduct over 4 million Covid-19 tests
-  Deliver 7 million doses of life-saving drugs
-  Supply 20,000 radios for first responders
-  Build 2.5 million affordable home appliances for families

ENGINEERING ROTATION PROGRAM

Phillips-Medisize offers an engineering rotational program to new college graduates at the *Bachelors* level with a degree in a related technical discipline.

- The Engineer is typically in the Rotational Program for an 18-month period, involving up to three, 6-month rotations at various Phillips-Medisize facilities (Czech Republic, Denmark, Finland, Ireland, Poland). International assignment opportunities may be available as well.
- During each rotation, the engineer works for an assigned engineering manager and a mentor who is trained to provide support and assist in development.

DEGREE PROGRAMS

Bioengineering	Manufacturing Engineering
Biomedical	Materials Science
Chemistry	Mechanical Engineering
Computer Engineering	Physics
Electrical Engineering	Plastics Engineering
Industrial Engineering	Quality

ENGINEERING ROLES

Automation	Plastics Processing
Cost Estimation	Project
Hardware Electronics	Quality
Manufacturing	Software
Mechanical Design	Supply Chain
Operational Excellence	Validation
